OPEN SOURCE CIRCULAR ECONOMY days

A Circular Economy is one that works without waste, saves resources and is in sync with nature. Rather than seeing emissions, by-products, or damaged and unwanted goods as 'waste', in the circular economy they become raw material and nutrients for a new production cycle.

This year, I am organizing the first ever **Open Source Circular Economy Day** in the Greater Vancouver Area**.** This event aims to move towards a circular economy by engaging our community in real hands-on action and transparent, open source methods. We are collaborating as part of a global effort to exchange ideas and solutions – prototyping systems, products and designs for an Open Source Circular Economy.

Date: June 11, 2016
Time: 9 am – 5 pm
Location: The HiVE, 128 W Hastings St, Vancouver, BC

We would like to invite you to join us in **discussion and collaboration** to achieve an Open Source Circular Economy, to take a hands-on approach to creating and sharing **practical solutions**, and most importantly, to be to a part of a **lasting, evolving and enabling Open Source Circular Economy community** in the Greater Vancouver Area.

While we have aimed to keep this event as low-cost as possible, we are also seeking financial or in-kind support from your organization. Your contribution would allow us to keep this event free so that we can equitably involve as many community members as possible.

If you are interested in participating or are able to sponsor this event, please contact me to further discuss your involvement.

Sincerely,

Belinda Li
