

# Open Source Circular Economy Days 2015

A GLOBAL EVENT EXPLORING THE OPEN SOURCE CIRCULAR ECONOMY

*A waste-free and sustainable circular economy cannot work without transparency, open access and open source solutions.*

**Open Source Circular Economy Days is a diverse & globally distributed event** using Open Source methodology to build a Circular Economy.

Experts and innovators from the fields of open source hardware, software, data, design, circular economy, waste, resource management and the collaborative economy will work together, globally connected, in order to develop, exchange ideas and prototype systems, products and designs for an Open Source Circular Economy.

*What is an Open Source Circular Economy?*

## Join Us!

CALL FOR LOCAL ORGANIZERS

**OSCEdays is an open platform.** Workshops, teardowns, co-design and prototyping will take place simultaneously in various cities all over the world.

Local events are organized by local groups, focusing on local challenges. Cities will be connected through various media channels including daily open video conferences and continuous online documentation, contributing to a global conversation and pool of knowledge on the Open Source Circular Economy.
